

Static Port Covers

AIRCRAFT MANUFACTURER	AIRCRAFT MODEL	AVAILABLE STATIC PORT COVERS
BOEING	All Commercial Aircraft	SPC-101
CESSNA	680	SPC-101
BOMBARDIER	Challenger 604, 605, 850	SPC-101
GULFSTREAM	G100, G150, G200	SPC-101
GULFSTREAM	G250, G280	SPC-101
GULFSTREAM	G5, G550	SPC-101
GULFSTREAM	G600, G650	SPC-101
GULFSTREAM	G2, G3, G4, G300, G400, G450	SPC-101
HAWKER BEECHCRAFT	Horizon 4000	SPC-101
LEONARDO	Anelia C-27J Spartan	SPC-101SPC27
LOCKHEED MARTIN	C130H/C-130H	SPC-101SPF
LOCKHEED MARTIN	C130J/C-130J	SPC-101SPF
SIKORSKY	H-60 Jayhawk	SPC-102SP-H60

For all other aircraft please see below.

The dimensions for the SPC-101 and SPC-102 are as follows: Overall size: 17" long x 3.5" wide x 3" tall
Suction cups are 2" in diameter
Port cover cups are 3.5" in diameter

The SPC-101 has a single cover cup. The SPC-102 has two cover cups and the distance between the cups can be adjusted. The minimum distance between the two cover cups on the SPC-102 is 3.5" and the maximum distance between the two cups is 6.5".

If the aircraft has a single static port, or double static ports that are less than 3.5" total distance apart, the SPC-101 Static Port Cover is required.

If the aircraft has two static ports and the ports are farther than 3.5" but less than 6.5" apart, the SPC-102 Static Port Cover is required. If the two static ports are more than 6.5" apart, a SPC-101 will need to be used for each port.
